An atlas is a collection of various maps of the earth or a specific region of the earth, such as the U.S. or Europe. The maps in atlases show geographic features, the topography of an area's landscape and political boundaries. They also show climatic, social, religious and economic statistics of an area.

Now fully revised and updated it is the only textbook and atlas of gross anatomy that illustrates all structures using high-quality dissection photographs AND clearly labelled line drawings for each photograph. This is combined with concise yet thorough text to support and explain all key human anatomy and clearly relate it to clinical practice.

### Human Anatomy Color Atlas and Textbook - 9780723438274 | US

Understand the difference between a textbook and an atlas: Simply put, an atlas is a compilation of all the drawings of each region of the human body, with labels on each drawing. A textbook is a wordy, lengthy description of the body, which of course also has drawings included, but they're usually not nearly as numerous or detailed as an atlas.
