Inverter Chargers are a combination of a DC to AC Inverter, as well as a mains (230VAC) to DC battery charger. These combi units often offer a high speed UPS function, enabling seamless transfer between grid or generator power and battery power.

Off-Grid Combined Inverter Chargers - DC to AC + AC to DC

When AC is recognized by the inverter charger, the unit will act as a pass through, power your devices from the AC source and also charge the batteries if desired. When the inverter charger detects a loss of AC, the unit will switch over to invert or DC mode and power your devices off of the batteries that the power inverter has been charging.
