difference in the sequence of bases

A DNA Restriction Analysis Laboratory Activity

All cells and some viruses contain DNA and this is a nucleic acid that contains the genetic instructions for the development and function of living things. DNA profiling is especially useful for solving crimes but can also be used to confirm if people are related to each other, such as for paternity testing. Test your knowledge on DNA basics by taking up the test below.

Quiz: A Basic Questions On DNA! - ProProfs Quiz

The biggest challenge remains the interpretation of those complex mixtures and the determination of the relevance of a contributor's DNA profile derived from an exhibit to the crime that has been committed.
