The First Plague Pandemic was the first Old World pandemic of plague, the contagious disease caused by the bacterium Yersinia pestis.Also called the Early Medieval Pandemic, it began with the Plague of Justinian in 541 and continued until 750 or 767; at least fifteen or eighteen major waves of plague following the Justinianic plague have been identified from historical records.

First plague pandemic - Wikipedia

The Antonine Plague of 165 to 180 AD, also known as the Plague of Galen (after Galen, the physician who described it), was an ancient pandemic brought to the Roman Empire by troops who were returning from campaigns in the Near East.Scholars have suspected it to have been either smallpox or measles. The plague may have claimed the life of a Roman emperor, Lucius Verus, who died in 169 and was ...

Antonine Plague - Wikipedia

The Roman Plague of 590 was an epidemic of plague that affected the city of Rome in the year 590. Probably bubonic plague, it was part of the first plague pandemic that followed the great plague of Justinian, which began in the 540s and may have killed more than 100 million Europeans before spreading to other parts of the world and which lasted until the end of Late Antiquity.
