Though Kovacs' Notes are probably the best set of exam notes written in ANY subject here at this medical school, they lack clear cut descriptions of the regions including their borders, skin innervation and muscles. The regional anatomy exam notes are simply an appendix to Kovacs' Notes supplementing the missing bits and pieces.

Anatomy is one of the most difficult subjects you learn in vet school. Memorizing all the anatomical structures and their functions is tough enough as it is, but you have a number of other classes to study for as well! Talk about time management.

## **13 Tips For Studying Anatomy More Effectively - EasyAnatomy**

Foliate papillae, covered with non-keratinized stratified squamous epithelium, are leaf- shaped structures defined by an invagination of the mucous membrane on their sides. Many taste buds on their lateral surfaces indicate their role in gustation. They are absent in ruminants but well developed in the horse and dog.
